#### **DETAILED ACTION**

#### Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/28/2006 has been entered.

#### Response to Arguments

2. Applicant's arguments with respect to claims 9-20 have been considered but are most in view of the new ground(s) of rejection.

### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 9-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Wang (US 6,614,774 B1).
- 5. In regard to claims 9 and 15, Wang disclosed:

a mobile terminal is associated with a first domain of said plurality of interlinked domains and a first subnet within said first domain, a DNS name server of said first domain storing a name for said mobile terminal and a first output address of said mobile terminal, which first output address includes an identifying identification of said first subnet, whereby the input to the network of said name for said mobile terminal causes said DNS name server of said first domain to output said first output address; [column 7, line 60 – column 8, line 16]

Art Unit: 2145

7.

9.

when said mobile terminal moves to a second subnet associated with a second domain of the plurality of interlinked domains, said DNS name server of said second domain stores said name for said mobile terminal and a second output address for said mobile terminal, said second output address including an identification of said second subnet, and said first output address stored in said DNS name server of said first domain is updated with an address of said DNS name server of said second domain, whereby an input to said network of said name for said mobile terminal causes said DNS name server of said first domain to output an address of said DNS name server of said second domain, and causes said DNS name server of said second domain to output said second output address; [column 7, line 60 — column 8, line 16] and

when said mobile terminal moves to a third subnet, also within said second domain, said second output address stored in said DNS name server of said second domain is updated with a third output address, said third output address including an identification of said third subnet.

[column 7, line 60 – column 8, line 16]

Wang disclosed a mobile IP system with a DNS lookup system. Mobile terminals were dynamically updated to new visited DNS networks.

6. In regard to claims 10 and 16, Wang disclosed:

no signal is sent between said first domain and said second domain as a consequence of the mobile terminal moving from the second subnet to the third subnet. [column 8, lines 17-32]

In regard to claims 11 and 17, Wang disclosed:

said mobile terminal requests that an update be sent to said DNS name server of said second domain upon moving to said third subnet. [column 8, lines 17-32]

8. In regard to claims 12 and 18, Wang disclosed:

said DNS name server of said second domain transmits updates to said DNS name server of said first domain regarding status of said mobile terminal. [column 8, lines 17-32] In regard to claims 13 and 19, Wang disclosed:

when said mobile terminal moves to a location within a third domain of said plurality of interlinked domains, a DNS name server of said third domain is configured to notify said DNS

Application/Control Number: 10/070,326

Art Unit: 2145

name server of said first domain to update said address of said DNS name server of said second domain with an address of said DNS name server of said third domain. [column 7, line 60 – column 8, line 16; column 8, lines 58-67]

10. In regard to claims 14 and 20, Wang disclosed:

when said mobile terminal moves to a location within a third domain of said plurality of interlinked domains, said mobile terminal is configured to notify said DNS name server of said first domain to update said address of said DNS name server of said second domain with an address of said DNS name server of said third domain. [column 7, line 60 – column 8, line 16; column 8, lines 58-67]

# Specification

11. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

## Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey R. Swearingen whose telephone number is (571) 272-3921. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Jason Cardone can be reached on 571-272-3933. The fax phone number for the organization where this
application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application
Information Retrieval (PAIR) system. Status information for published applications may be obtained from
either Private PAIR or Public PAIR. Status information for unpublished applications is available through
Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should
you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC)
at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative
or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-2721000.
